

System requirements for MPEG-1 and DVD or MPEG-2

MPEG-2 / DVD:

Executable under Windows 95/98/2000, MacOS, UNIX/Linux.

Requires DVD player software or an MPEG-2 decoder card. For pure software playback, you need a PIII 600 MHz processor with a suitable graphics adapter. The decoder card is independent of the processor because it takes on the "work" in this case.

MPEG-1:

Windows:

IBM or compatible PC with 90 MHz Pentium or faster. Windows 95/98 or Windows NT/2000. Four-speed CD-ROM drive (8 x recommended).

Macintosh:

PPC 601/100 MHz or faster. Quicktime 3 or higher. Four speed CD-ROM (8 x recommended).

UNIX/Linux:

Software for playing back MPEG-1 program streams, for example Mtv, plaympeg. Four speed CD-ROM drive (8 x recommended).

of its parts”

The IBM Forum Stuttgart – Information Technology as the Motor for Productivity and Growth

As a result of the up-to-the-minute deployment of IT, strategic competitive advantages open up. The IBM Forum Stuttgart has the complete spectrum of IT services for business. Here, board members and IT managers of large and medium companies, software developers, students, journalists, IBM business partners and, not least, IBM employees can acquire for themselves an overview of the importance of IT in the age of Pervasive Computing and e-business.

The IBM Forum Stuttgart as an integrated center provides a broad demonstrations and solutions portfolio. This portfolio includes integrated, strategic solutions from IBM as well as from Business Partners and Alliance Partners and is permanently updated. The cross-functional network of experts and the integration of new offerings and trends are a further strength of the IBM Forum Stuttgart. Hence, new vistas and business opportunities open up for customers of all branches as well as NetGen Companies. Designing and organizing tailored sessions, including content and agenda consulting round up the service offerings of IBM Forum Stuttgart.

The IBM Forum Stuttgart is at your disposal for successful business. Come to the "Marketplace for Information Technology"!
