

And there is more at the TMCC!

The IBM Executive Briefing Center is part of the Böblingen Technical Marketing Competence Center (TMCC), which supports IBM clients and their projects. Thus a briefing can be the beginning of a fruitful partnership.

As follow on to a briefing, TMCC technical experts can help you take a closer look at the concepts and ideas discussed in a briefing. For example, we support Proof of Concept (PoC) analyses, which demonstrate whether solutions can be applied to your IT environment.

Another possibility is a one-day technical seminar or workshop to help your IT support team get a better understanding of a solution discussed in a briefing. As a client has commented: "Teamwork was essential in driving our project to its successful completion. That's why PoCs at the TMCC are so effective."

To schedule a briefing at our center, contact your IBM sales representative or Business Partner. We look forward to seeing you soon!

IBM Executive Briefing Center

IBM Executive Briefing Center – Tailored consultation and expertise!

We offer insight into the newest IBM hardware and software solutions. At our center, you can learn about IBM technology trends and IBM's future strategies to help optimize your IT investments.

Through the expertise of developers from Böblingen, we provide a wide range of topics – from overview to in-depth consultancies – hosted in a modern briefing center to foster the exchange of ideas.

Take advantage of:

- *Presentations of latest IBM technologies*
- *Live solution demonstrations*
- *Personal discussions with our technical experts*
- *Experienced briefing managers to fulfil your needs and requirements*

Every year, our experts consult with over 4000 clients and Business Partners of all sizes, from all industries and from all over the world.

We offer customized briefings and workshops, that can combine hardware and software. Tell us what you need!

IBM Systems – Seeing is believing!

IBM's open standards-based portfolio of systems, servers, storage systems and emerging technologies help businesses large and small resolve today's most common and immediate infrastructure management issues – and build the IT foundation for on demand business. We show IBM solutions to answer your business needs.

- *IBM Systems (z, p, i, x, BladeCenter, Storage) from positioning to in-depth technical consulting.*
- *Hardware and technology solutions for high availability, security, recovery and storage management*
- *Server consolidation through IBM virtualization technologies*
- *IBM infrastructure solutions for on demand business applications*
- *IT service management solutions, for example, IBM Dynamic Infrastructure solutions*
- *SAP scenarios for IBM Systems*
- *Linux on IBM Systems, to take advantage of open source and open standards*

This is just a selection of what we can offer. Challenge us to present and show solutions to enhance your business!

IBM software solutions – You set the agenda!

Open. Scalable. Secure. Industry focused. IBM software products and industry solutions help you innovate and become more flexible, while making the most of current resources and controlling costs. In addition, IBM software supports Service-Oriented Architecture (SOA) standards for creating enterprise-wide applications. Come to us and take an in-depth look at our software solutions including:

Information Management software for integrating data and content to leverage enterprise information

WebSphere the integration and application infrastructure software – flexible and reliable

Tivoli intelligent system management software for an on demand world

Lotus software for collaboration and human productivity

Rational tools for governing software and systems development
